

Practice 1-2

Example Exercises

- Are $N, P, Q,$ and R coplanar?
- Are $N, J, P,$ and Q coplanar?
- Are $N, M,$ and L coplanar?
- Name in two different ways the plane that contains $F, G, D,$ and E .
- Are $A, B, D,$ and E coplanar?
- Are B and H collinear?
- Are $C, H,$ and E collinear?

- Name plane P in another way.
- What is the intersection of \overleftrightarrow{ST} and \overleftrightarrow{TR} ?
- What is the intersection of \overleftrightarrow{TR} and plane P ?
- What is the intersection of plane P and plane STQ ?
- What is the intersection of \overleftrightarrow{SQ} and \overleftrightarrow{TR} ?
- What is the intersection of plane P and plane STR ?
- What is the intersection of \overleftrightarrow{ST} and \overleftrightarrow{SR} ?
- What is the intersection of plane P and \overleftrightarrow{SQ} ?

Which of the following are collinear?

- | | | |
|-----------------|-----------------|---------------------|
| 16. T and R | 17. S and Q | 18. $S, T,$ and R |
|-----------------|-----------------|---------------------|

Which of the following are coplanar?

- | | | |
|---------------------------------------|---------------------------------------|---|
| 19. $S, Q,$ and R | 20. $S, T,$ and R | 21. $S, T, R,$ and Q |
| 22. \overleftrightarrow{ST} and R | 23. \overleftrightarrow{ST} and Q | 24. \overleftrightarrow{ST} and \overleftrightarrow{TR} |
| 25. \overleftrightarrow{TR} and S | 26. \overleftrightarrow{TR} and Q | 27. \overleftrightarrow{TR} and \overleftrightarrow{SQ} |

- If five points are collinear, are they coplanar?
- If five points are coplanar, are they collinear?
